

Frag Bag

Bomb Mitigation Containment System

Lightweight. Low Cost. Lifesaving.

QinetiQ North America's Frag Bag is a bomb containment enclosure designed to contain fragments and mitigate the blast pressure from a typical pipe bomb. Frag Bag is commonly used to provide safety to local and federal law enforcement, private security, postal security and corporate mail room personnel.

Flexible Design

Frag Bag is compatible with bomb disposal robots and is designed with a number of "grab points" that allow it to be opened, loaded, closed and transported with a bomb stick or remote manipulator. With its compact design, Frag Bag can easily fit into the trunk of a car and is light enough to be hand carried.

Proven Technology

Frag Bag is a product of QinetiQ North America's family of protective LAST Armor® that is used worldwide on military tactical land vehicles and aircraft.

Features/Benefits

- Provides safety from a typical pipe bomb (2" D x 8" L with 1 lb of Pyrodex® propellant)
- Safe to x-ray - no metal parts
- Captures fragments for forensics
- Enhances safety transporting small pyrotechnics such as detonator caps or detcord
- Lightweight - less than 25 pounds
- Fits easily into the trunk of a car
- Dimensions: 22" L x 13" W x 12" H
- LAST Armor is listed in the GSA Advantage
